EXTERNAL TRADE OF GEORGIA

2008

EXTERNAL TRADE OF GEORGIA

STATISTICAL PUBLICATION
The statistical publication was prepared by the External Trade and Foreign Investments Statistics Subdivision of the Macroeconomic Statistics Division, Department of Statistics, Ministry of Economic Development of Georgia.
**Abbreviations**

- ლ. - litri
- თ. - kvadratuli metri
- მ. - m³ - cubic meter
- მლ. - million
- KWh - kilowatt-hour
- Thsd. - thousand
- USD - United States Dollar

**Symbols**

-  - Not applicable
0  - Negligible magnitude

Notice: The discrepancy between the totals and the sum in some cases can be explained by using rounded data.
The statistical publication “External Trade of Georgia 2008” covers declared data on the trade (excluding non-organized trade) between Georgia and the rest of the world in 2008.

The publication is prepared based on information provided by Revenue Service of Ministry of Finance of Georgia, JSC „Georgian Electrosystem” and “Georgian Gas Transportation Company” Ltd. All the adjustments available by July 1, 2009 are in it. The data are compiled according to the international standards.

The publication is designed for a wide circle of users: state employees, scientists, students, businessmen, journalists and other interested persons.

Short describing methodology

For External Trade Georgia uses the “general method”, which means that crossing a border of the economic territory of the country is the main criterion for determining exports and imports.

Export implies both the export of domestic production and the reexport of imported goods. Import implies importing of the production and reimport of imported goods.

Export is valued at FOB prices, are used to value export i.e. prices at the border of the exporting country (this term means that the seller’s obligation to deliver is fulfilled when the goods have passed over the ship’s rail at the named port of shipment), while import is valued at CIF prices, that is, transportation costs to the border of the importing country included in the prices as well as insurance costs.

There are following criteria to determine the partner country: for imports the country of origin or the sending country, while for exports the country of destination.

Database of Customs Declarations (DBCD) is the main information source on external trade transactions. Department of Statistics receives DBCD monthly from Revenue Service of Ministry of Finance of Georgia. Information on gas and electric power is obtained from corresponding sources, to complete the data.

Based on obtained information, Department of Statistics carries out the following activities:

- Checks DBCD – commodity codes, prices, weights, dates of customs declarations, country codes for origin/destination, non-existent codes of country and commodity;
- Controls the limits on prices main commodities and adjusts quantities or prices or supplementary unit;
- Removes from the database commodities which according to internationally approved methodology should not be classified as external trade in goods (securities, bank notes and coins in circulation; diplomatic and other analogous goods).

“Commodity Nomenclature for External Economic Activities” founded on the Harmonized Commodity Coding and Description System, is used of export registration

The value indicators are given in USD. The calculation of the statistical value in USD is carried out by Customs Services during the registration of Customs Declarations according to the official exchange rate established by the Interbank Monetary Exchange at the moment of the registration.

### Notes

- The code 8210 refers to hand tools and is classified under the HS code 82.4.82.
- The code 8211 refers to knives with cutting blades, which is classified under the HS code 82.5.82.
- The code 8212 refers to razors and razor blades, which is classified under the HS code 82.5.82.
- The code 8213 refers to scissors and blades therefor, which is classified under the HS code 82.5.82.
- The code 8214 refers to other articles of cutlery, which is classified under the HS code 83.1.82.

### Additional Details

- The table provides a detailed breakdown of exports by HS commodity positions for the year 2008 in Georgia.
- Each entry includes the HS code, the commodity description, and the value in thousand USD and tons.
- The table is continued from a previous page, indicating that the full list of exports is not visible in the current image.
